

**Anti-Complement factor I (human)
 Mouse monoclonal antibody**

PRODUCT NO.

HYB 061-01

Subclass: IgG1/k

Clone: 3D6

PRESENTATION

Preparation: Protein-A/G purified

Content: Available in 200 µL and 1 mL size. 1 mg/mL +/- 15%. See Certificate of Analysis for details.

Solvent: 0.01 M phosphate buffer, pH 7.4, containing 0.5 M NaCl and 15 mM sodium azide

Storage: 4-8°C without exposure to light. No precautions necessary during handling.

ANTIGEN

Factor I, a serine protease, is a regulatory component of both the alternative and the classical complement pathway. Factor I is synthesized as a single chain precursor of 88 kDa, processed to yield the active form, composed of two disulfide-linked chains, the α -chain (50 kDa) and the β -chain (38 kDa) (2). The concentration in plasma is 35 µg/ml (1).

IMMUNOGEN

Factor I isolated from human plasma adsorbed onto aluminum hydroxide gel

SPECIFICITY

HYB 061-01 is specific for the α -chain of human factor I

EPI TOPE SPECIFICITY

Not determined

REACTIVITY

HYB 061-01 reacts strongly with factor I. A strong reaction is seen with normal human plasma when used in sandwich ELISA in combination with a polyclonal antibody against factor I as capture antibody (e.g. sheep anti human factor I from Serotec). In Western blotting after SDS-PAGE, HYB 061-01 reacts with factor I in non-reduced form.

CULTURE MEDIUM

RPMI 1640 with 10% fetal calf serum

FUSION PARTNER

X63-Ag8.653

IMMUNIZATION

Female CF1 x BALB/c mice immunized by intraperitoneal injection

APPLICATION

Method	Usability	References
ELISA	Yes	
Immunoblotting	Yes	
Immunohistochemistry	Not determined
