

## PRODUCT SPECIFICATION

### Anti Hemopexin

Subclass: IgG1/k

PRODUCT NO.	<b>ABS 013-32</b>	<b>B</b>																
PRESENTATION	Preparation: Biotinylated Content: Available in 200 µL and 1 mL, 1 mg/mL Solvent: 0.01 M phosphate buffer, pH 7.4, with 0.14 M NaCl and 15 mM sodium azide Storage: In the dark at 4-8°C																	
ANTIGEN	Hemopexin is a serum glycoprotein that binds heme and transports it to the liver for breakdown and iron recovery, after which the free hemopexin returns to the circulation. Structurally hemopexin consists of two similar halves of approximately two hundred amino acid residues connected by a histidine-rich hinge region. Each half is itself formed by the repetition of a basic unit of some 35 to 45 residues.																	
IMMUNOGEN	Hemopexin purified from human plasma																	
SPECIFICITY	ABS 013-32 is specific for human hemopexin																	
EPITOPE SPECIFICITY	Epitope of ABS 013-32 differs from ABS 013-04																	
REACTIVITY	ABS 013-32 binds hemopexin when coated on ELISA wells or presented by an antibody capture coat of ABS 013-04.																	
CULTURE MEDIUM	RPMI 1640 with 10% fetal calf serum																	
FUSION PARTNER	SP2mIL6.																	
IMMUNIZATION	NMRI x BALB/c mice immunized i.p. with immunogen adsorbed onto Al(OH) <sub>3</sub>
